

External Genesis and DoveX system - runs ProcallX only

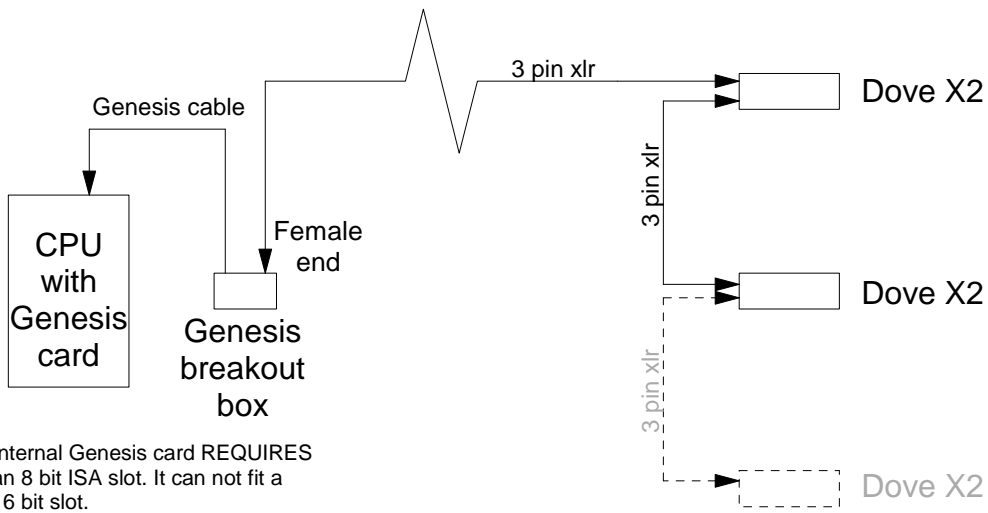

Each Genesis output can control up to five Doves.

Each DoveX or Dovex2 can control up to three projectors. It is preferred when using only two projectors per Dove to use "A" and "C" connections.

All versions of Procall run under DOS only. A Windows DOS box is not an option.

Internal Genesis and DoveX2 system - runs Enhanced Procall

Internal Genesis card REQUIRES an 8 bit ISA slot. It can not fit a 16 bit slot.
